inYXA EasyPick

Optimizing Supply Chain

EasyPick is a simple and highly efficient mobile scanning application that is easy to deploy and expertly completes your mobile warehouse transactions. It is built for customers looking for an intuitive and cost-effective mobile solution.

Designed and Built by WMS Experts

Simplified Installation

Choose the progressive web application with an adaptive user interface to optimize multiple workflows.

No Separation

Paperless work dispatching and simplified workflows offer zero separation between real time transactions and physical inventory.

Efficient Mobile Transactions

Extendable pick-pack-ship mobile forms that are configured to meet customer demands.

Compatible Integration

Seamlessly operate with a wide range of handheld devices and printers.

Test your inventory picking workload on EasyPick today.
