*Solve common asset tracking challenges using Inyxa Easypick and RFID hardware to achieve increased accuracy, improved efficiency, better utilization & Enhanced security of assets.*

#### **EASYPICK RFID ASSET MANAGEMENT**

With Inyxa's EasyPick RFID solutions, you can have real-time tracking of valuable inventory, customer orders, manufacturing jobs, and internal assets with a modern, cloud-based, configurable system. EasyPick RFID combines mobile and web-based software with state-of-the-art RFID hardware that solves common asset tracking challenges, improves inventory accuracy, and increases order fulfillment speed.

## FIXED ASSET TRACKING

- Locate Assets in real-time
- Check-in + Check-out functionality
- Built-in alerts dashboard with email and text messaging system
- Track directional movement of Assets
- Built-in mobile RFID label printing and label management

## INVENTORY + ORDER FULFILLMENT ACTIVITY

- Mobile RFID Cycle Counting
- Item and SKU-based Inventory Heat Map with Warehouse Floor Schematic
- Touchless Inventory Move • transactions
- Track outbound pallets with RFID-enabled alerts for truck loading confirmation
  
- Built-in mobile RFID label printing and label management
- Track serialized items with item-specific EPC tags
- Configurable reports and dashboards

## MANUFACTURING PRODUCTION TRACKING

- Capture manufacturing cycle time, tracking jobs from station to station
- Touchless WIP completion, WIP moves, and Inventory Move system transactions
- Track quality and labor metrics with built-in configurable reports and dashboards
- Built-in mobile RFID label printing and label management
- Track serialized items with item-specific EPC tags

## INYXA'S EASYPICK RFID SOLUTIONS OFFER SEVERAL BENEFITS FOR BUSINESS OPERATIONS:

### REAL-TIME TRACKING

Allow for real-time tracking of assets within a warehouse, allowing for improved visibility & accountability.

### INCREASED ACCURACY

Eliminate the need for manual tracking methods, reducing the chance for human error and increasing accuracy in asset tracking.

### BETTER UTILIZATION

With real-time tracking, operations managers optimize asset utilization and reduce idle assets, leading to increased efficiency and cost savings.

### ENHANCED SECURITY

Help prevent loss and theft by providing a secure and traceable system for tracking high-value assets.
